How to Enroll: <https://akulacybersec.com/Enroll.php>

Why CyberSecurity?

Cyber Security is important because it protects all categories of data from theft and damage. This includes sensitive data, personally identifiable information (PII), protected health information (PHI), personal information, intellectual property, data, and governmental and industry information systems.

Global demand for cyber security experts is forecast to outstrip supply by a third before the end of the decade, with Frost and Sullivan's latest Global Workforce Survey predicting a shortage of 1.5 million security professionals by 2020, based on current trends. Priorities need to quickly shift towards plugging this cyber security skills gap before it is too late.

Here you build your career with us. Akula Cybersec Solutions would like to commence a new batch for Cyber Security Analyst. We provide end-to-end training on Emerging Cyber Security trends, industry requirements.
